RETIREMENT TOOL Angular | Express JS | HTML | CSS | My SQL

- Modernized Retirement tool by upgrading from version Angular 9 to Angular 16, and Node version Node 14 to Node 20 resulting in enhanced performance, improved user experience, and compatibility with newer technologies.
- It's a Bajaj Capital tool. The main purpose of this tool is to calculate how your money will be invested and in which schemes. So that you can get a good return and monthly income after the retirement.

FIRE TOOL Angular 16 | HTML | CSS

- Developed a dynamic FIRE score tool enabling users to calculate their retirement corpus based on variables like age, life expectancy, inflation, and expected returns.
- Designed the tool for lead generation, supporting corporate marketing initiatives by attracting prospects and encouraging detailed retirement planning.

RETIREMENT PREPAREDNESS SCORE Angular 16 | HTML | CSS

- Developed the Retirement Preparedness Score (RPS) Tool, an interactive questionnaire with 15 closed-ended MCQs that calculates a user's retirement preparedness score based on weighted responses.
- Designed dynamic score-based outputs, including a real-time score meter and range-based inferences to help users assess their retirement readiness and plan effectively.
